

The HeartStation 1.3 ECG Management System

IMPAX HeartStation is a comprehensive data management solution automating departmental workflows, streamlining ECG interpretation tasks to complete the daily reporting activities. HeartStation's cart-neutral translation engine leverages existing investment of carts and provides purchasing freedom for a best of breed approach for future clinical services. HeartStation's integration to your EMR solution or clinical imaging suite permits access to ECG information in context of a patient from any point of clinical care.

Accelerate **critical decision-making**,
boost productivity, and **reduce costs**.

With the Agfa HealthCare IMPAX® HeartStation® ECG Management System, you can utilize your preferred cardiograph equipment to dramatically improve access to ECG exams throughout the secure hospital network, wherever it extends.

Why HeartStation?

- Are you ready for the next generation **15-lead ECG** carts?
- Does your ECG management system store all the cardiac reports for the patient's **entire cardiac history**?
- Do you have tools for **side-by-side comparison** to confirm today's ECG examination?
- Does your management system offer **vendor flexibility** for a best of breed cart approach for your diverse clinical services?

Why HeartStation ECG Management?

- **Comprehensive data management solution** Automates processing, storing and displaying electrocardiograms (ECGs)
- **Accepts standard resting ECGs and/or cardiac reports** from different cardiograph models
- **Resting ECGs** can be measured, interpreted, compared to previous ECGs (“serial comparison”), printed and stored with a preliminary diagnoses
- **Review electrocardiogram reports, and edit & add comments** before signing electronically
- **Browser access to ECG records**

HeartStation ECG Management and Reporting

- Vendor Independent Management of:
 - ✓ 12 Lead
 - ✓ 15 Lead
 - ✓ Defibrillators
 - ✓ Stress Reports
 - ✓ Holter Reports
 - ✓ Event Monitoring
 - ✓ Glasgow Analysis
 - ✓ Critical Finding Labels
- EMR and CRS Thin Client Presentation
- Automated Order Reconciliation
- Fax, Email and Print from Patient Listings
- Data Migration from Legacy 12 Lead Systems

Centralized point of care

Streamline cardiologist interpretation tasks.....

- More Devices - More Vendors
 - collecting the cardiac exams for ECG assessment
- Resting ECGs
 - 15-lead
 - 12-lead
- Defibrillators (12 lead)
- Cardiac Reports (PDFs)
 - Stress
 - Holter
 - Event monitoring
 - Spirometry
